Happy fiying!

- The   Jumper Development team.

🚧 Safety & Precautions.

Many radio control models are equipped with powerful motors and sharp spinning propellers. Please exercise caution when working on models. Ensure power is disconnected from your models and remove propellers when performing maintenance.

Do not operate the T-LITE radio system under the follow conditions.
• During bad weather or high wind conditions such as rain, hain, snow, storms or electromagnetic events.
• During any conditions of limited visibility.
• In areas where people, property, powerlines, roads, vehicles or animals may be in present.
• If you are felling tired or unwell or under the influence of drugs or alcohol.
• If the radio or model appear to be damaged or not functioning correctly.
• In areas of high 2.4GHz interference or in locations where use of 2.4GHz radios is prohibited.
• When the battery is the T-LITE or the model is too low to function.

☁️ Manuals and firmware downloads.

The T-LITE is are shipped with openTX software installed as standaed. To download the latest Software manual please visit http://www.open-tx.org/downloads.

To download the latest firmware for your radio please visit the openTX website at the following link.https://www.open-tx.org/downloads.

CAUTION!

The T-LITE is shipped with the most stable firmware at the time of manufacture. Please only update firmware if you are experienced and confident in updating system firmware. Incorrect updates may render the radio inoperable.
